

# Malwarebytes operating instructions

## Guide

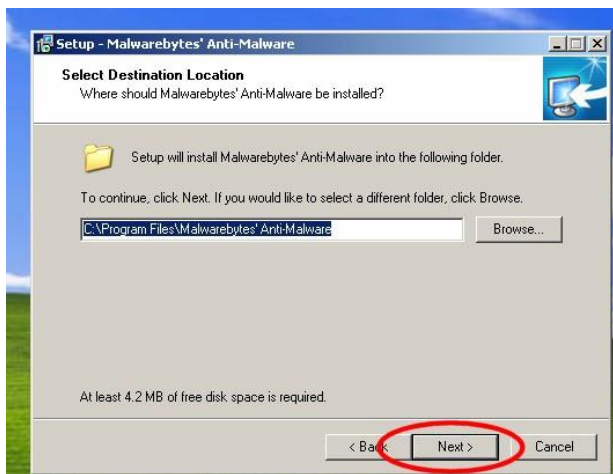

Double click on the downloaded program and the Malwarebytes' welcome screen will appear. Click on NEXT.

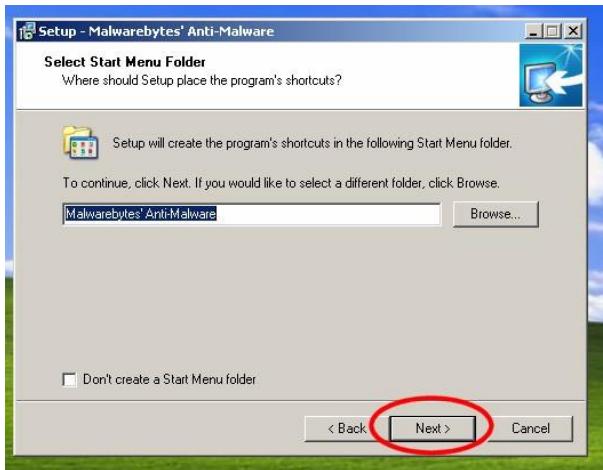

Accept the license agreement. Press NEXT.

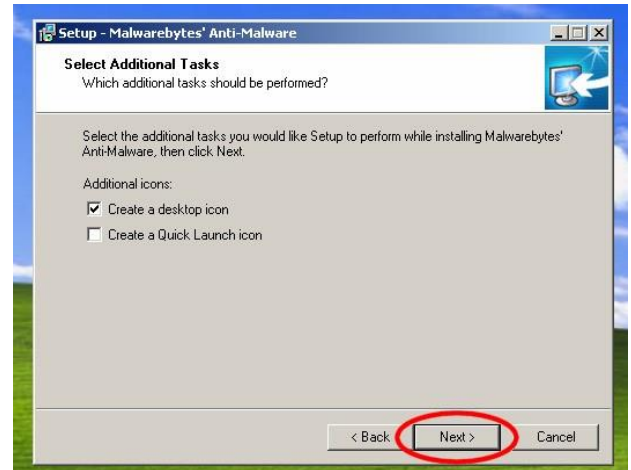

Accept the important information. Press NEXT.

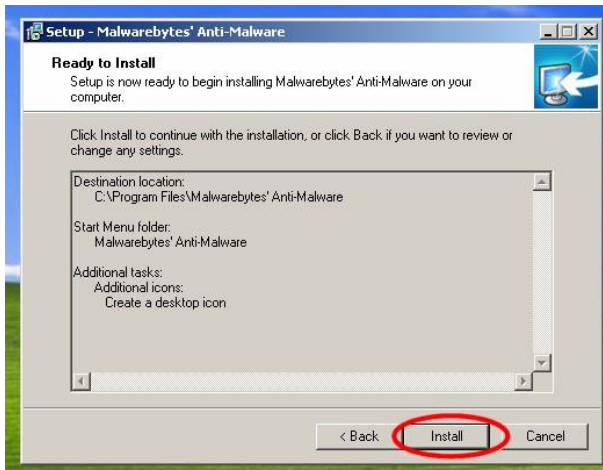

Accept the Destination location. Press NEXT.

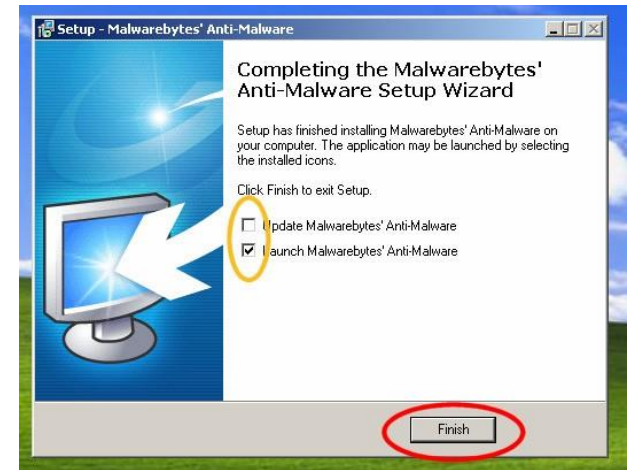

Accept the start menu folder. Press NEXT.

Accept the default of additional tasks. Press NEXT.

Ready to install. Press INSTALL.

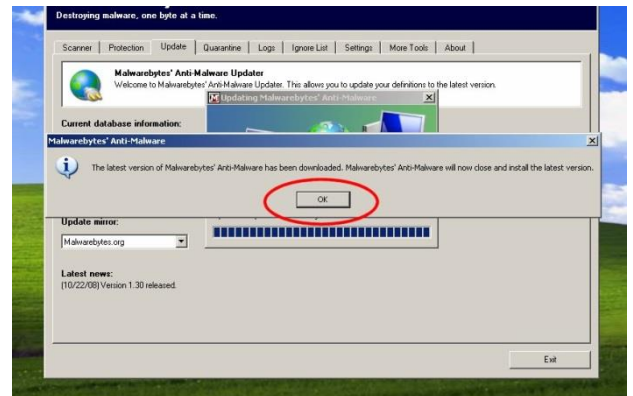

Deselect the update option and have selected the launch option. Press FINISH.

To run the program , double click on the Malwarebytes icon and the program interface will appear.

Select the CHECK FOR UPDATES tab.

When the updates are completed a message will appear letting you know it will be installing the latest version. Press OK.

When it is completed it will let you know. Press OK

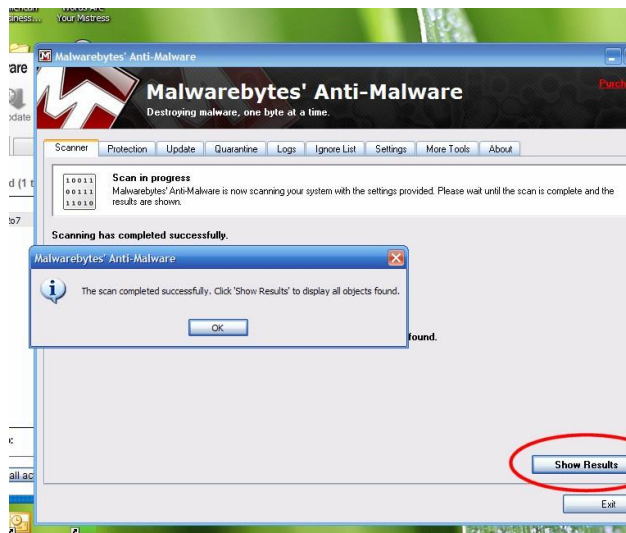

Next, select the SCANNER tab.  
Select the PERFORM FULL SCAN then press the SCAN button.

Choose the drive you would like to scan (Drive "C" is all you need checked).

When the scan is completed click on the SHOW RESULTS button

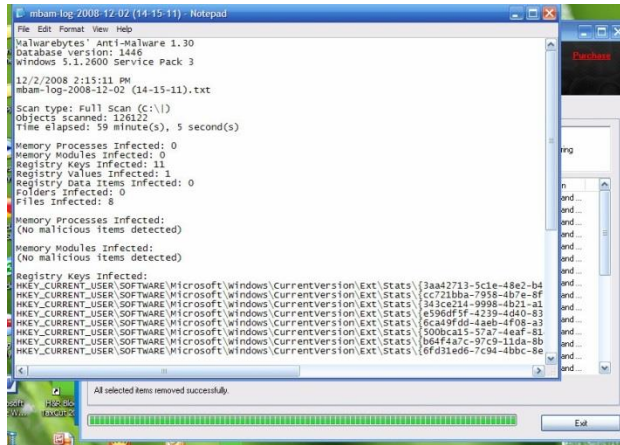

The program will list all the files it found infected. Select Remove Selected.

The program will list all the files it found infected. Select Remove Selected

When completed malwarebytes creates a log file.

The program will then notify that it is complete. You can now close the program.
